

Akshara Avinash Sarode

USA | (930) 904-4536 | Email: aksharasarode@gmail.com

PROFESSIONAL SUMMARY

Business & Data Analyst with experience analyzing **operational** and **financial** datasets, developing **forecasting models**, and delivering actionable insights that support workforce planning, operational efficiency, and strategic decision-making. Skilled in **SQL**, **Power BI**, **Excel**, **Tableau**, **KPI reporting**, **trend analysis**, capacity planning, and **business intelligence** with a strong focus on performance measurement, reporting automation, and data-driven business solutions.

EDUCATION

Master of Science in Computer Science

Indiana University Bloomington

Bloomington, Indiana

August 2024 – May 2026

Bachelor of Engineering in Computer Engineering

University Of Mumbai, India

Mumbai, India

July 2020 - May 2024

TECHNICAL SKILLS

Languages: Python, Advanced SQL (CTEs, Window Functions), R, PySpark

Database: MySQL, PostgreSQL, Oracle, MongoDB, Snowflake, ETL Workflows

Analytics: SQL, Tableau, Microsoft Power BI, Advanced Excel (Pivot Tables, VLOOKUP, Data Functions), Looker, Alteryx, Dashboard Design & KPI Storytelling

AI/ML: ChatGPT, OpenAI API, LLM Development, AI Workflow Optimization

Cloud: Azure, AWS, Databricks, Git, CI/CD Fundamentals, Data Pipelines

Others: Business Insights Generation, Revenue Analytics, Customer Segmentation, Product Operations, Product Analytics, User Behavior Analysis

EXPERIENCE

BUSINESS DATA ANALYST | INDIANA UNIVERSITY

September 2025 – May 2026 | Indiana, USA

- Analyzed **250+ operational datasets** using **SQL**, **Python**, **LLMs & AI-assisted analytical techniques** to identify business trends, engagement patterns & performance insights to improve **reporting reliability by 60%** through validation workflows.
- Developed **15+ executive dashboards** and **KPI reporting solutions** tracking **operational performance**, **user engagement**, **business metrics**, and system consistency supporting data-driven decision-making and reducing reporting turnaround time by **40%**.
- Collaborated cross-functionally with technical and business teams to **analyze business requirements** into actionable insights, identify data issues, and ensure data accuracy and translate business requirements into recommendations that increased **analytics adoption by 35%**.

DATA ANALYST | INDIANA UNIVERSITY

August 2025 – December 2025 | Indiana, USA

- Developed advanced **SQL workflows**, **analytical models** & data transformations performing data modeling, transformation, QA checks, achieving **93% validation data accuracy** through validation and reconciliation processes.
- Designed **Power BI dashboards** and reports to track **performance metrics**, reducing **manual effort by 45%** while improving **data accessibility**, **process transparency** and **governance** across teams to support product and business decision-making.
- Conducted **trend analysis**, **process evaluation** by documenting **metric definitions**, **assumptions**, and **SOPs** using **Jira** and **Agile methodologies**, to identify optimization opportunities improving student **success analytics by 40%**.

DATA ANALYTICS INTERN | DELOITTE (FORAGE)

April 2025 – June 2025 | Remote, USA

- Analyzed **129,600+ operational and financial records** using **SQL** and **Excel** to identify workflow inefficiencies, performance trends, and process improvement opportunities, reducing **operational downtime by 70%** through **exploratory data analysis** and reporting optimization.
- Built **Tableau dashboards** and executive reports visualizing **25+ KPIs** improving stakeholder visibility and **reporting efficiency by 65%** and **business insight delivery** presented on **JIRA** & decision-making through recommendations and data storytelling.

PROJECTS

RETAIL SALES DATA PIPELINE USING MICROSOFT FABRIC | Microsoft Fabric, PySpark, SQL, Delta Lake, Power BI

- Built a scalable **ETL pipeline** processing **913K+ retail transaction**, implementing a **Bronze–Silver–Gold architecture** to clean, transform, and **structure raw data** into **analytics-ready datasets**, supporting operational reporting and business analysis workflows.
- Designed **dimensional star schema data model** and optimized SQL transformations logic to improve **query performance** and reduce processing time for **multi-dimensional analysis** improving reporting performance, process efficiency, and operational visibility.
- Developed **Power BI dashboards** with **KPI monitoring** and interactive visuals, enabling stakeholders to identify **performance trends**, uncover **inefficiencies**, and support operational improvements.

SAFETY INTELLIGENCE DATA ANALYSIS | Power BI, Python, SQL, Textblob, Spacy, RAKE

- Processed and analyzed **20,000+ safety incident records** using Python and SQL, applying NLP techniques to extract structured insights from unstructured text and identify recurring risk patterns and operational inefficiencies with **92% classification accuracy**.
- Built an **ETL pipeline** using **SQL** and **Power Query** to clean, validate, and transform raw datasets, ensuring **high data quality** and enabling accurate **trend analysis** across multiple dimensions thereby ensuring **linguistic accuracy**.
- Designed & deployed **Power BI dashboard** with **KPI tracking** and anomaly detection visuals with **8 analytical visuals** including enabling stakeholders to monitor safety performance, identify high-risk areas, and implement process improvements to reduce operational risks.

FAANG FINANCE ANALYTICS | Power BI, SQL, Excel, DAX queries

- Analyzed **95,000+ financial records** to evaluate **revenue trends**, profitability metrics, & performance across FAANG companies, enabling data-driven insights into financial efficiency opportunities to drive investment decisions & improving **subscription growth**, media **metadata visibility** by **30%**.
- Built advanced **Power BI dashboards** using **30+ DAX measures** to track **KPIs** such as ROI, cash flow, and earnings trends, providing stakeholders with clear visibility into **financial performance** and **decision-making metrics** ensuring **business outcomes & financial modeling** insights.
- Analyzed digital media campaign through an **EPS benchmark of 19.56**, pie & matrix visuals highlighting net income contribution (**Apple: 38.29%**, **Google: 32.92%**), volume trends peaking in 2010, offering a snapshot of **capital efficiency** & trading dynamics across FAANG firms.

NETFLIX CONTENT ANALYTICS | Power BI, SQL, Snowflake, DAX, Python

- Built scalable **ELT pipelines** within a **Snowflake data warehouse** to process and structure **8,800+ content records**, enabling efficient querying and analysis of **user engagement** and **content performance metrics** quantifying impact on **traffic behavior** with **98% accuracy**.
- Automated **manual refresh inefficiencies** and **dashboard** with **12+ measures** to analyze **genre dominance**, **audience rating segmentation**, unlocking predictive **analytics** and **storytelling models**.
- Performed **exploratory data analysis** and actionable business intelligence insights using **Power BI (DAX, slicers, KPIs)** improving **data accuracy by 96%** to uncover patterns in viewing behavior and content success factors, delivering insights that supported data-driven decision-making and content planning strategies.
